RE: **Not-so-smart APS AMI WMD**

Dear Commissioners,

The ***not-so-smart AMI WMD cancer causing mechanism*** that we need to avoid in Arizona, first came to the attention of Dr. George Carlo, during the 28.5 million dollar study he directed for the cell phone industry. **Non-thermal formation of micronuclei appeared repeatedly.**¹ The cell phone industry sought to repress the information and I have not heard APS warn us of our highly increased exposure to micronuclei formation from APS 'Smart' Automate Meter Infrastructure radiation.

Micronuclei, non-thermal cancer formations, were induced in cell phone users at .7 and .8 watts per kilogram. FCC thermal guidelines are 1.6 watts per kilogram. The FCC *guidelines* support industry sales. They are not biologically based safety standards.

Micronuclei are created when double strand DNA breaks take place. Micronuclei indicate disruption in DNA repair. They are caused by nuclear radiation and they are caused by cell phone and AMI microwave radiation. Two pathways: same results.

Micronuclei are formed when fragments of DNA produce a cell membrane and reproduce themselves as if they were whole healthy DNA cells.

Finding micronuclei is a very serious thing. It impacts the repair job that the body is expected to do. **It is why AMI is a WMD.**

¹ **Dr. George Carlo Tells the History of Mobile Phone Industry Part 3**
<http://www.youtube.com/watch?v=z8DRJckM18U>

Dr. Carlo's mobile industry study involved 200 research doctors and 15 epidemiological studies from 1993 to 1999.²

After the Chernobyl disaster took place, Russian citizens were tested for micronuclei. Dr. Carlo said that if micronuclei were present, a person was treated as a cancer patient.

According to Dr. George Carlo, the FCC is a commission based agency and does not have the authority to set safety standards. Industry points to 1.6 watts per kilogram as a safety standard but it is **NOT** a safety standard. Industry says it meets "all of the applicable safety standards" forgetting to tell the public that **there are no applicable safety standards!**³

APS PROTECTS ITS WMD AMI

With regard to the APS Research Department, I requested information about EPA Smart Meter standards. The answer was another *spin doctored* APS MYTH:⁴

"APS has reviewed EPA health and safety standards of smart meters. After review, none of the EPA standards showed smart meters to be in breach of their standards."

After a number requests for the specific EPA documents reviewed by APS, I received an honest answer from staff:

"There are no EPA safety standard documents referring to smart meters, so of course 'smart' meters are not in breach of no standards."

SOCIOPATHS TAKE OVER

Dr. George Carlo says the EPA is the most aggressive government agency in terms of controlling radio frequency radiation emissions. According to Dr. Carlo, the cell phone industry would ***never*** have been able to follow our EPA standards: the National Environmental Policy Act Standard (NEPA).⁵ It is probably true that NEPA standards did not specifically name 'Smart Meters' or 'AMI' but certainly NEPA ***principles*** apply, to wireless microwave technologies, for those with the **heart to look for the greatest general benefit for Life on Earth.**

Dr. Carlo visited the EPA department responsible for EMF communications for the entire US. In 2006, Dr. Carlo found only one man in charge of protecting the entire US from hazardous EMF communications and *he was under a gag order not to speak with the public!*

When I phoned the EPA, *the last man had retired*: "Off to be a full time grandfather!" I was told there was nothing left of that EPA department: no funding, no people, no equipment. The only thing left: "a book of rules."

Proponents of AMI WMDs are not students of NEPA Standards that protect DNA, the human genome, the wholesome life of families with healthy children in healthy environments.

Barbarian sociopaths want to keep the People of Arizona entrapped in an AMI mesh network microwave concentration camp! Where can any of us go to keep our families safe?

Wake up if you are asleep to this ugly, ugly, evil plan!

Let us all wake up and make this right for all of us!

June 13, 2014

From someone who woke up earlier than most:

"I have no doubt in my mind that at the present time, the greatest polluting element in the earth's environment is the proliferation of electromagnetic fields. I consider that to be far greater on a global scale, than warming, and the increase in chemical elements in the environment."

Robert O. Becker MD.
Twice nominated for Nobel Prize

Commissioners,

PLEASE RECALL HAZARDOUS AMI IMMEDIATELY.

YOUR JOB IS TO RID ARIZONA OF AMI WMDs

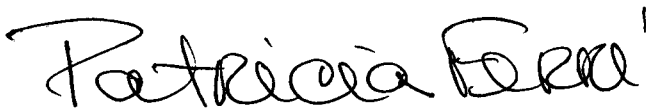

We have a special opportunity in Arizona: an opportunity to really make a difference right now.

Maybe we can pave the way for others to do the same!

If there is a shadow of a doubt that AMI is indeed a
WEAPON OF MASS DESTRUCTION,
please try the point of view of
A CRIME AGAINST HUMANITY
and
A CRIME AGAINST OUR BEES, BIRDS AND
OUR RAPIDLY DWINDLING SPECIES

A.R.S. 40-361.B and A.R.S. 40-321.A
are clear on health and safety

Respectfully Submitted,

Patricia Ferre
